

# TEENAGE MUTANT NINJA TURTLES

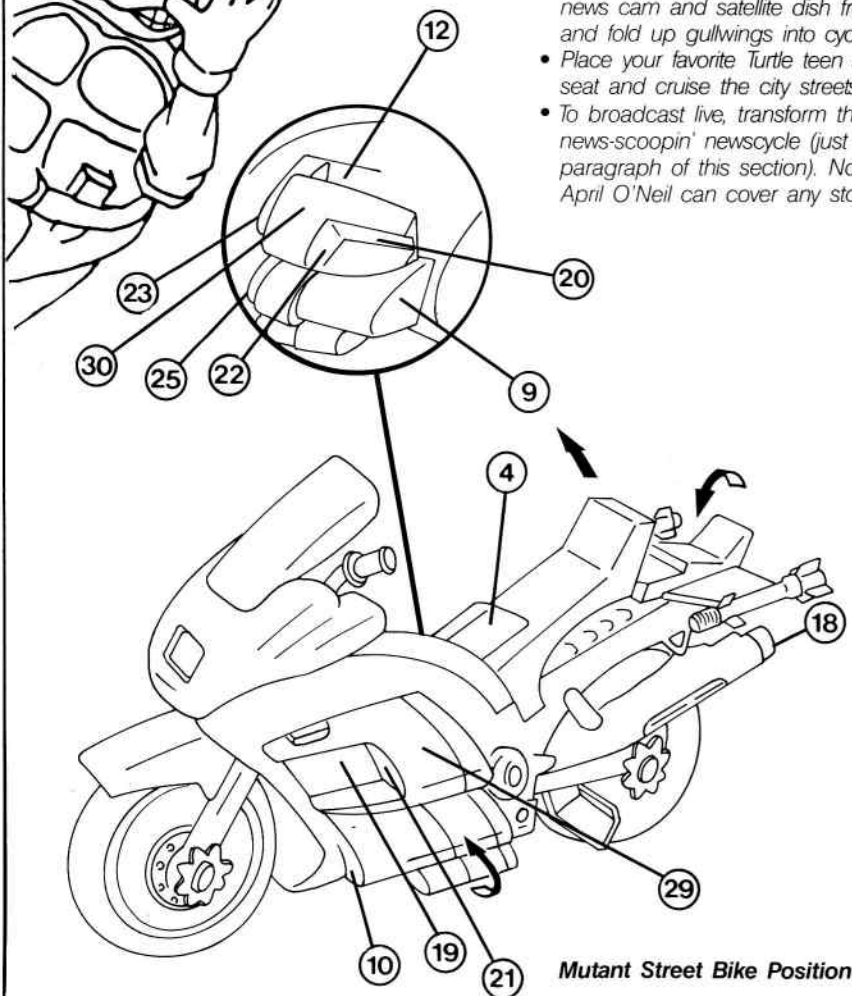

Kids,  
follow these  
simple blueprints,  
it's easy!

## Assembly

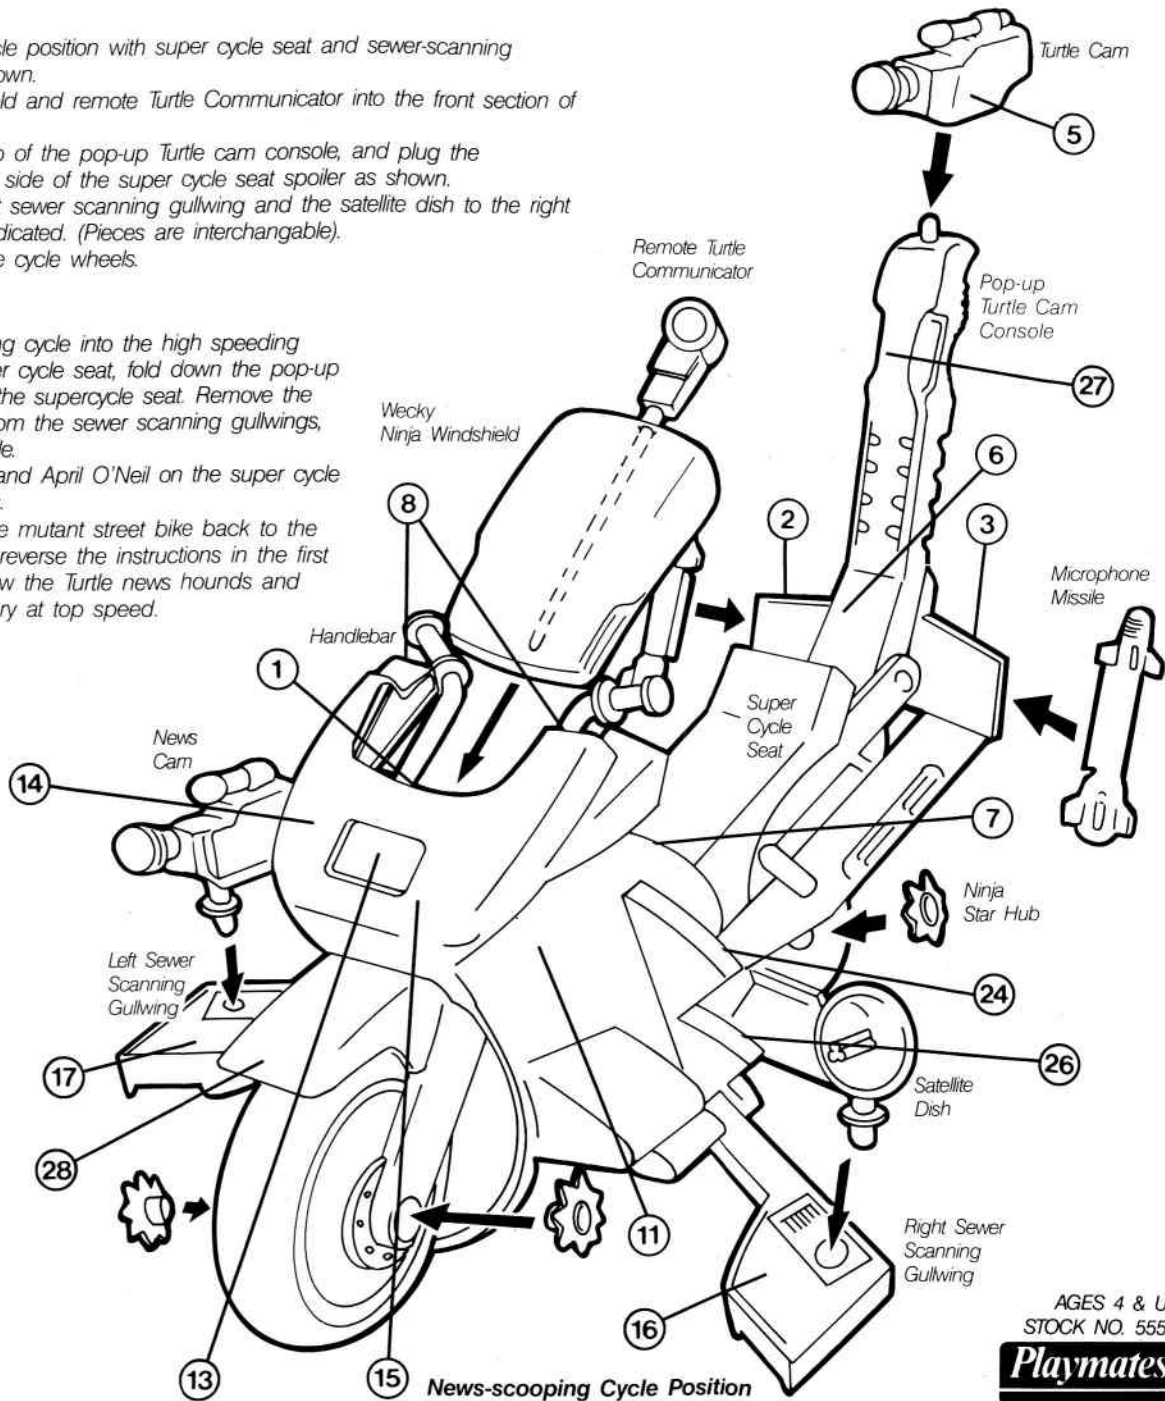

- Start in the news scooping cycle position with super cycle seat and sewer-scanning gullwings fully extended as shown.
- Plug the wacky Ninja windshield and remote Turtle Communicator into the front section of the cycle as indicated.
- Snap the Turtle cam to the top of the pop-up Turtle cam console, and plug the 2-microphone missiles to each side of the super cycle seat spoiler as shown.
- Snap the news cam to the left sewer scanning gullwing and the satellite dish to the right sewer scanning gullwing as indicated. (Pieces are interchangeable).
- Plug the Ninja star hubs to the cycle wheels.
- Place labels 1-30 as shown.

## Directions

- To Transform the News-scooping cycle into the high speeding Mutant street bike, lift the super cycle seat, fold down the pop-up turtle cam console and lower the supercycle seat. Remove the news cam and satellite dish from the sewer scanning gullwings, and fold up gullwings into cycle.
- Place your favorite Turtle teen and April O'Neil on the super cycle seat and cruise the city streets.
- To broadcast live, transform the mutant street bike back to the news-scoopin' newsycle (just reverse the instructions in the first paragraph of this section). Now the Turtle news hounds and April O'Neil can cover any story at top speed.
