

Mutations™

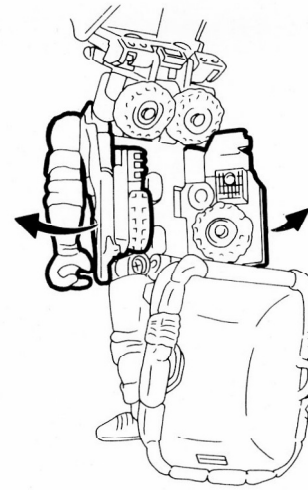

TEENAGE MUTANT NINJA

TURTLES®

1. Position Construction Mutation Leonardo's feet so they are turned out, as shown. Rotate his head so he's facing straight back.

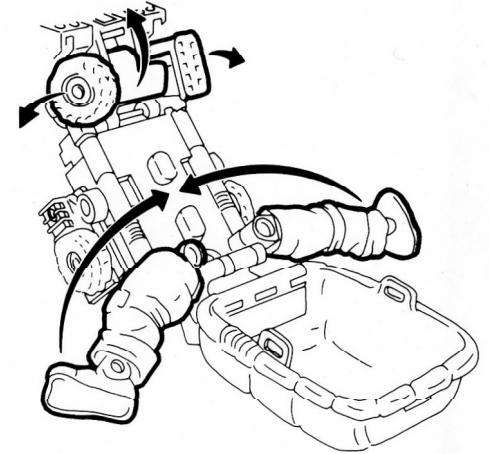

2. Pop open and fold down the Turtle shell back. This becomes the bed of the dump truck. Swing up the cab front as shown.

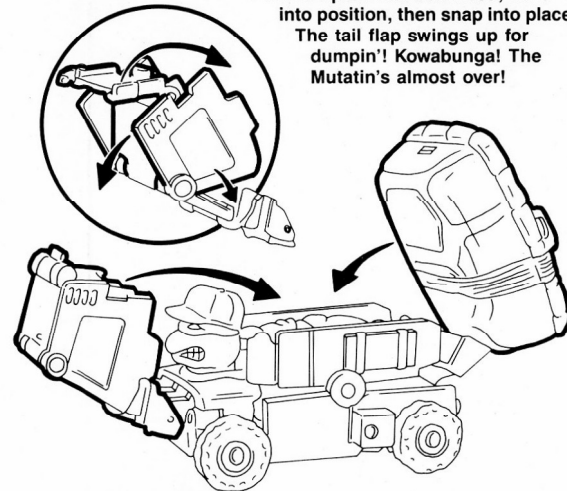

3. Pull straight up on the cab front to expose the front wheel assemblies. Fold out the side arm panels around as far they will go, so Leonardo's arms are tucked together.

4. Unsnap the front wheels and swing them out as far as they will go. Pull out on the front wheel support flap as shown. Swing Leonardo's legs up, one foot under the other.

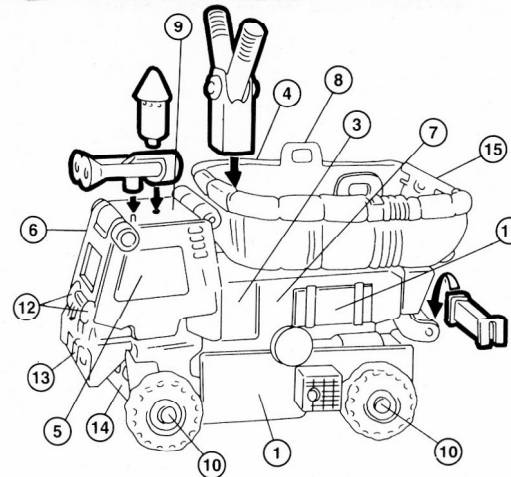

6. Make sure Leonardo's head is facing forward. Unfold the cab windshield assembly by lifting and pulling up. Position the cab up and over Leonardo's head, swing the doors up, then down and snap into place. Then fold down the cab rear window and snap into the two side panels just behind his head.

7. Lift up on the truck bed, lower into position, then snap into place. The tail flap swings up for dumpin'! Kowabunga! The Mutatin's almost over!

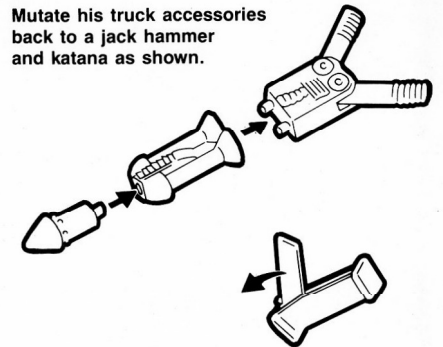

5. Swing both front wheels into position and snap the front wheel support flap down to lock into place, as shown. Separate and fan open both back wheel assemblies. Rotate both assemblies around and snap them into place by locking tabs into slots, as shown.

8. Add the finishing touches by Mutatin' Leonardo's Katana Blade into a Bodacious Bumper. His Jumpin' Jack Hammer Mutates into Hero Alrhorns, Dump Truck Tilt Handle and Mega Exhaust Pipes, as shown.

9. To Mutate the construction vehicle back to a figure, simply reverse the above steps. Now, you're really Mutatin'!

Mutate his truck accessories back to a jack hammer and katana as shown.

CAUTION: Never force parts together. The Mutation process is accomplished with patience and a little snapping. If parts aren't fittin' just right, try re-aligning the pieces.
